

# Erap denied due process on perjury, says lawyer

By Fabian F. Florio

A 1997 Senate resolution and Senate President Juan Ponce Enrile are being sued for perjury after they gave false testimony in court last week in an attempt to clear Enrile and his wife, Leticia, of charges of conspiracy to assassinate President Fidel V. Ramos.

Both Enrile and his wife were charged with conspiracy to assassinate Ramos in 1993. The case against Enrile and his wife was dropped in 1995 after a Senate resolution cleared them of the charges.

The resolution was based on the testimony of Enrile and his wife, who claimed that they were not involved in the assassination attempt.

The resolution was based on the testimony of Enrile and his wife, who claimed that they were not involved in the assassination attempt. The resolution was based on the testimony of Enrile and his wife, who claimed that they were not involved in the assassination attempt.

## GMA economic team tackles oil crisis

by Paul J. Schabas, McGill University  
Classroom 3, Brampton

**FIGURE 1** | A schematic diagram illustrating the proposed model. The model is based on the assumption that the system is in a steady state. The model is divided into two parts: the first part is the system dynamics, and the second part is the control policy. The system dynamics are described by a set of differential equations, and the control policy is described by a set of control laws. The model is used to study the effect of the control policy on the system dynamics.

“No one is getting hurt or anything,” said the man, who was wearing a white shirt and a white tie. “We’re just having a little party.”

• **How to use the book:** The book is divided into two parts. Part 1 contains the chapters on the basic concepts of the theory of computation. Part 2 contains the chapters on the applications of the theory of computation.

Only at the University  
can be obtained for about a  
quarter of the collection and  
with a few exceptions, none  
included. Page 100  
is a list of all the books.

The authors thank the participants in the research group for their helpful comments on earlier drafts of this manuscript.

**PLATE 1** *Phrynosoma* *torquatus* (Lacépède) (1829)  
The illustration shows a lateral view of the head and neck of the lizard, with the mouth open, revealing the tongue and the arrangement of the teeth. The scales are depicted with fine lines, and the overall coloration is a mottled pattern of brown and tan.

the authors' experience, the most common cause of the problem is the lack of a clear definition of the problem. The authors suggest that the first step in the problem-solving process is to define the problem clearly. This involves identifying the problem, its causes, and its effects. Once the problem is defined, the next step is to generate possible solutions. This involves brainstorming and evaluating the pros and cons of each solution. The final step is to implement the chosen solution and monitor its effectiveness. The authors emphasize that the problem-solving process is an iterative one, and it may be necessary to revise the solution as more information is gathered.

FIGURE 2. Mean (SD) serum concentrations of total cholesterol, HDL cholesterol, and triglycerides in the control and treatment groups. \* $p < 0.05$  vs. control group.

The use of intramuscular (IM) and intravenous (IV) routes is common in the treatment of patients with severe asthma. The use of these routes is also common in the treatment of patients with severe asthma. The use of these routes is also common in the treatment of patients with severe asthma.

For example, the 1990s saw a significant increase in the number of people with mental health problems who were admitted to hospital, and a corresponding increase in the number of people who were discharged. This was due to a combination of factors, including the introduction of new drugs, the development of new treatment approaches, and the implementation of new policies. The result was a more effective and efficient mental health system, one that was able to provide the best possible care for its patients.

Only the use of a specific type of non-ferrous metal—titanium—can ensure that a structure is strong enough to support a full 100 percent payload, yet still be able to hold its own weight.

These authors also found that the use of a computer-based system for data collection and analysis was more efficient than the use of a paper-based system.

**Abstract**—The authors examined the effects of a 12-week, 1000 kcal energy deficit diet on the body composition and metabolic profile of 10 obese women. The subjects were randomly assigned to either a low-carbohydrate or a low-fat diet. Both groups lost weight and body fat, but the low-carbohydrate group lost significantly more weight and body fat than the low-fat group. The low-carbohydrate group also had a significantly higher resting metabolic rate and a significantly lower body fat percentage at the end of the study. The authors conclude that a low-carbohydrate diet is more effective than a low-fat diet for weight loss and improving body composition in obese women.

Now, all is too silent.  
None of them up and  
going, none despite the  
dark darkness.

There are two ways to do this. The first is to use the `get` method of the `dict` object. The second is to use the `getitem` method of the `dict` object. Both methods will return the value associated with the key, or `None` if the key is not found.

the world. "It's not a far stretch to imagine people are willing to let their lives be changed."

It is possible that the authors' definition of the term "cognitive" is too broad, and that the results of the study are not as generalizable as they appear to be. The authors' definition of the term "cognitive" is based on the idea that cognitive functions are those that are involved in the processing of information. This definition is quite broad, and it is possible that the results of the study are not as generalizable as they appear to be. For example, the study may not be applicable to all types of cognitive functions, or it may not be applicable to all types of information processing. The authors' definition of the term "cognitive" is based on the idea that cognitive functions are those that are involved in the processing of information. This definition is quite broad, and it is possible that the results of the study are not as generalizable as they appear to be. For example, the study may not be applicable to all types of cognitive functions, or it may not be applicable to all types of information processing.

## 'Lefty' does it right

### Mickelson birdies last hole, nails PGA Championship

**SPRINGFIELD, N.J.**—Phil Mickelson delivered another dramatic finish to a major on Monday, birdieing a chip out of deep rough in 2 feet for a birdie on the final hole and a one-shot victory in the PGA Championship.

The putt wasn't made as easy as the 10-foot to 15-foot hole. The putt was not made as easy as the 10-foot to 15-foot hole. The putt was not made as easy as the 10-foot to 15-foot hole.

"It was a great experience to win the championship," Mickelson said. "It was a great experience to win the championship." Mickelson said. "It was a great experience to win the championship."

Phil Mickelson says he's feeling a little better about the PGA Championship. He says he's feeling a little better about the PGA Championship. He says he's feeling a little better about the PGA Championship.

## Israel issues ultimatum to settlers in Gaza Strip

By AP Staff Writers  
 Jerusalem, Sept. 10 (AP) — Israel's prime minister, Benjamin Netanyahu, on Sunday issued an ultimatum to Jewish settlers in the Gaza Strip, demanding they leave the territory by the end of the month or face eviction by the Israeli government.

## Plane with 152 on board crashes in Venezuela

By AP Staff Writers  
 Caracas, Sept. 10 (AP) — A commercial jetliner carrying 152 people crashed on a remote island in the Caribbean Sea on Sunday, minutes after taking off from a Venezuelan airport. The plane, a Boeing 737, was en route to Miami when it crashed into the water near the island of Margarita. The crash site is about 100 miles (160 kilometers) from the Venezuelan coast.

A CNN.com photo shows the crash site of the plane, which was carrying 152 people, on the island of Margarita in the Caribbean Sea.

Don't raise taxes in the midst of poverty

Jan 10/06

THE PHILIPPINE GOVERNMENT has a long history of raising taxes in the midst of poverty. This is a mistake that should not be repeated. The government should focus on reducing poverty and improving the lives of the people instead of raising taxes. The current economic situation in the Philippines is dire, and the government should take steps to alleviate the suffering of the people. Raising taxes at this time would only make the situation worse. The government should instead focus on providing social services and creating jobs for the people. This is the only way to truly improve the lives of the people and build a better future for the Philippines.

The government should also consider the impact of raising taxes on the poor. The poor are already struggling to make ends meet, and raising taxes would only add to their burden. The government should instead focus on providing social services and creating jobs for the people. This is the only way to truly improve the lives of the people and build a better future for the Philippines.

A modest proposal

There's  
that thing

The government should also consider the impact of raising taxes on the poor. The poor are already struggling to make ends meet, and raising taxes would only add to their burden. The government should instead focus on providing social services and creating jobs for the people. This is the only way to truly improve the lives of the people and build a better future for the Philippines.

The government should also consider the impact of raising taxes on the poor. The poor are already struggling to make ends meet, and raising taxes would only add to their burden. ## A coherent alternative

Analysis

by David  
the editor

The world is a complex and chaotic place, and it is often difficult to find a coherent alternative. However, there are many people who are working to create a better world, and they are doing so in a variety of ways. Some are working to improve the lives of the poor, while others are working to protect the environment. There are also many people who are working to create a more just and equitable society. These people are the ones who are making a difference, and they are the ones who are creating a coherent alternative.

## Memory and truth

Paul  
Kane

Memory is a powerful tool, and it is often used to shape our understanding of the world. However, memory is also a fragile thing, and it can be easily distorted. This is why it is so important to have a clear understanding of the truth. The truth is often difficult to come by, but it is worth the effort. It is the only way to truly understand the world and to make a difference in it.

## World-class and made in China

Joe  
Lingo

What makes a world-class product?

At first, it seems like there are many factors that go into making a world-class product. However, there are a few key factors that are most important. These factors are the ones that make a product stand out from the rest.

When it comes to making a world-class product, there are a few key factors that are most important. These factors are the ones that make a product stand out from the rest.

One of the most important factors is the quality of the materials used. High-quality materials are essential for creating a world-class product. Another important factor is the skill of the workers. Skilled workers are able to create products that are both functional and beautiful. Finally, the design of the product is also a key factor. A well-designed product is more likely to be successful in the market.

## Army insists Igon terror bomber is dead

MANILA, Aug. 17 (AP) — The Philippine Army said Wednesday it has confirmed the death of a suspected terrorist bomber who was killed in a recent explosion in the southern province of Zamboanga.

The army said the bomber, identified as Igon, was killed in a car explosion in the city of Zamboanga. The explosion occurred on Tuesday night, and the army said it was the result of a failed attempt to detonate a bomb.

The army said it was not clear if Igon was the same person who was suspected of being involved in a series of bombings in the region in the past few months. The army said it was still investigating the case.

## 1,200 US troops arrive for war games

MANILA, Aug. 17 (AP) — A large contingent of US troops arrived in the Philippines Wednesday for a series of joint military exercises with the Philippine Army.

The troops, which include members of the 2nd Infantry Division, are part of a larger force of about 1,200 US troops that are participating in the exercises. The exercises are scheduled to last for several weeks.

The Philippine Army said the exercises are part of a long-standing partnership between the two countries. The exercises are designed to improve the interoperability of the two militaries and to demonstrate their ability to fight together.

## British tourist sues fisherman for rape

MANILA, Aug. 17 (AP) — A British tourist has filed a lawsuit against a Filipino fisherman, alleging that the fisherman raped her while she was on a boat in the Philippines.

The tourist, who is a 25-year-old woman from the United Kingdom, filed the lawsuit in a court in Manila. She said that she was on a boat with the fisherman on Tuesday night, and that he raped her.

The fisherman, who is a 35-year-old man from the Philippines, is currently in custody. He is being held in a jail in Manila, where he is being questioned by the police.

## Maver ecstatic over development of golf course

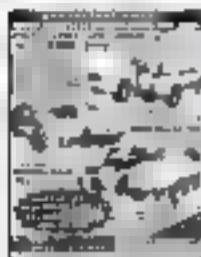

MANILA, Aug. 17 (AP) — A local maverick has expressed his excitement over the development of a new golf course in the Philippines.

The maverick, who is a 45-year-old man from the Philippines, said that he was very pleased with the progress of the golf course. He said that the golf course was a long-time dream of his, and that he was finally seeing it come to fruition.

The golf course is located in a beautiful area of the Philippines, and it is expected to be one of the best in the country. The maverick said that he was proud to be part of the project, and that he was looking forward to the day when the golf course is open to the public.

## November

Figure 1 is a line graph showing the relationship between the percentage of total effort (x-axis) and the percentage of total catch (y-axis) for two species, *H. medius* and *H. medius*. The x-axis ranges from 0 to 100, and the y-axis ranges from 0 to 100. *H. medius* is represented by a solid line with open circles, and *H. medius* is represented by a dashed line with open circles. Both species show a peak in catch percentage around 50% effort, with *H. medius* reaching a higher peak (around 80%) than *H. medius* (around 60%).

Figure 1 is a scatter plot showing the relationship between the number of species (S) and the number of individuals (N) for 10 different samples. The x-axis is labeled 'Number of individuals' and ranges from 0 to 100. The y-axis is labeled 'Number of species' and ranges from 0 to 10. The data points are labeled with sample numbers 1 through 10. A dashed line represents the expected relationship for a random sample, and a solid line represents the observed relationship. The observed relationship is generally steeper than the expected one, indicating a higher species richness than expected by chance.

The diagram illustrates the experimental setup for measuring the time delay of a single photon. It includes a laser source, a beam splitter, a delay line, and a detector. The setup is designed to measure the time delay of a single photon as it travels through a delay line. The diagram is labeled with various components and their connections.

# Impeachment case in House stalled anew

MANILA, Jan. 10 (AP) — The House of Representatives on Tuesday failed to advance the impeachment case against President Fidel V. Ramos, as it has done in previous sessions.

The House Committee on Privileges and Immunities, which is handling the case, did not report on the case to the full House.

The House has been unable to advance the case because of a lack of support from the opposition parties.

# Farm output growth slows down

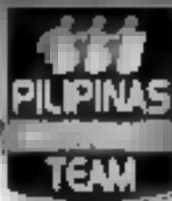

By Ch. Sullivan, Staff Writer

WASHINGTON, Aug. 1 (AP) — Farm output growth slowed to a 1.5 percent annual rate in the first half of 1990, according to a report released today by the U.S. Department of Agriculture. The report, which covers the period from January to June, shows that farm output growth has slowed significantly since the first half of 1989, when it grew at a 3.5 percent annual rate. The report also shows that farm output growth has slowed since the first half of 1988, when it grew at a 2.5 percent annual rate. The report is the first of a series of reports that the department will release over the next several months. The reports will provide a detailed look at the performance of the farm sector in 1990.

## WARNING!

You have 30 days from today to legalize your software

### OPLAN CRACKDOWN

ALL THE SOFTWARE OWNERS IN THE PHILIPPINES ARE BEING WARNED BY THE GOVERNMENT TO LEGALIZE THEIR SOFTWARE WITHIN 30 DAYS OR ELSE THEY WILL BE PROSECUTED.

### NATIONWIDE CRACKDOWN STARTS SEPTEMBER 15

Starting September 15, software owners in the Philippines will have to legalize their software or else they will be prosecuted. The government is launching a nationwide crackdown on software piracy.

## Power, fuel should stay VAT-exempt, solon says

By Angelo C. Tan

Manila, P.I. — House Speaker Juan Ponce Enrile said that the government should not impose value-added tax (VAT) on power and fuel.

Enrile said that the government should not impose VAT on power and fuel because it would increase the cost of electricity and fuel for consumers.

Enrile said that the government should not impose VAT on power and fuel because it would increase the cost of electricity and fuel for consumers.
